

SWINGMASTER™ SWING JOINTS

Whether used in conjunction with the Matrix Applied Technologies Floating Suction and Skimmer system, or with a third-party engineered solution, our SwingMaster™ joints are engineered for even the most extreme applications. Built to last, SwingMaster™ central type swing joints are constructed using rugged cast iron/ductile iron with plain Ni-Resist bearings (copper free) and are internally and externally epoxy painted for Jet A1 service.

With most sizes in stock and ready to ship, our SwingMaster™ joints are available in 4 to 36 inch flange diameter. Other sizes are available based on application and need. All SwingMaster™ joints up to 24 inch diameter are ANSI 150# Flat Face. Above 24 inch diameter, flange standards vary.

Precision engineered and built to last, SwingMaster™ swing joints are designed for a wide range of service applications.
